

Resolution
Supporting Religiously Neutral Policies Regarding
Access to Reproductive Health Care

In order to promote religiously neutral, evidence based policy on all matters regarding access and regulation of reproductive health services and ensure Texans are not coerced into abiding by the religious beliefs of others, be it resolved that we support:

- Repealing Targeted Regulation of Abortion Providers (TRAP) which impose medically unnecessary regulations with the intention of closing clinics that perform abortions
- Providing state funding to clinics providing essential family planning services, regardless of whether or not they also perform legal abortions
- Taking steps to ensure Texans who are uninsured or underinsured have access to the full spectrum of reproductive health care they need
- Measures to ensure medical providers with religious or moral objections to providing certain standard medical procedures or services, in the case of an emergency, will either refer the patient to another provider willing to do so in a timely manner, or perform the procedure or service themselves
- Measures to ensure religiously affiliated medical providers are exceedingly transparent to patients about the services they will and will not provide, and provide referrals for standard services they are unwilling to provide, without undue delay or disparagement
- Access to legal abortions without prerequisite requirements, such as forcing women to undergo an ultrasound, state counseling, or a waiting period
- Removal of parental notification requirements for minors seeking a legal abortion
- Removal of the ban on telemedicine for the performance of medication abortion
